BEED Engineering
333 Wishing Well Circle SW
Palm Bay, FL. 32908

To whom it may concern:

I would like to commend BEED Engineering on the excellent service they provided to our university. Michael Frempong stayed connected with us and the contractor throughout the duration, was very responsive, and provided a good design solution that has been implemented and is performing well. I recommend his engineering talent to others and look forward to working with his firm on future projects.

Sincerely,

Gregory I. Tsark, AIA
Vice President for Facilities Operations
University Architect

BEED Engineering
333 Wishing Well Circle SW
Palm Bay, FL.

To whom it may concern:

As Project Manager for the Olin Life Sciences Fume Hood Modernization project at Florida Tech, I would like to offer my highest recommendation for Michael Frempong and BEED Engineering, Engineer of Record for the project. The design included a coordination plan to keep this facility in operation throughout the duration. The project was completed on a critical schedule and within budget. There were no complaints from the occupants for any disruption. In fact kudos were offered by the department head. The systems are functioning well and should result in substantial energy savings. Especially noteworthy is this is the first project with which I have been associated that did not have a single review comment from City Officials performing the plan review. I intend to recommend involvement of BEED Engineering on future projects at Florida Tech.

Sincerely,

John M. Milbourne
Director, Facilities Operations

To whom it may concern,

I have known Michael Frempong for approximately 10 years and find him to be one of the most professional engineers I've ever known in the 30 plus years of my work experience. We have worked on numerous projects and has always had drawings done on time and on budget. In addition he is very easy to work with and willing to discuss all possible options in designing mechanical and plumbing systems.

Please feel free to contact me at your convenience if you have any questions.

Respectfully, *Dave*

Subject: Referral

To whom it may concern,

We have use Michael on a few projects, from simple one room additions to custom residential remodels and additions. Not only did Michael meet our client's needs, but exceeded them in every facet. From initial contact and preliminary scope to final walk thru and inspections. His commitment to detail, professionalism, and can do attitude is rare in today's construction industry. His knowledge and understanding of what is needed for each project helped to ease the clients minds and helped them to understand the why's and how's of the MEP package. We will not hesitate to use Michael on upcoming projects, no matter how small or large they are.

Thanks Michael for being part of our team!!
